

# Introducing Involta SecureFinance<sup>SM</sup>

A Secure Technology Suite Designed for the Financial Services Industry. Protect Environments, Safeguard Data, and Enable Around-the-Clock Service Delivery.

With decades of experience in working with the Financial Services and Technology industries industry, we understand evolving client needs and regulatory compliance standards demand 24/7/365 service excellence. Success is closely tied with reliable technology. That's why we've developed a secure suite of focused services that work together to drive innovation, enhance employee productivity, enable secure remote operations, and improve client satisfaction - all while protecting companies and data from internal and external cyber threats.

We're hyper-focused on protecting IT environments – bringing essential systems, policies, and procedures together under a single umbrella and providing solutions from end-to-end. From conducting assessments to implementing secure, compliant solutions, and everywhere in-between, Involta offers hybrid IT solutions through purpose-built infrastructure, national expertise, and local, collaborative people who deliver.

Involta has partnered with Fortra's Alert Logic to provide award-winning managed detection and response solutions because IT security is non-negotiable. Together, Involta and Fortra's Alert Logic enable clients to detect and resolve threats across technology platforms quickly before they can cause real harm to IT environments.

## Industry-Leading Managed Detection and Response (MDR)

Companies of all sizes in every industry are under attack. The Financial Services and Technology industries are certainly no exception. Involta and Fortra's Alert Logic, the industry's leading managed detection and response provider, have collaborated to offer a comprehensive global security monitoring and response solution customized for the financial services industry. With 24/7/365 protection across both private and public IT infrastructure, Involta customers can trust they are operating securely at all times. Together, Involta and Fortra's Alert Logic preserve company health amid the rapidly changing business landscape.

### A holistic solution for secure IT services that enhance service delivery.

#### GRC Assessment

Evaluate your IT environment to ensure 100% compliance with any governing policies.

- Compliance Ready Assistance
- Risk Identification
- Remediation Planning

#### Hybrid IT Consulting

Craft a hybrid IT solution that meets strict requirements while streamlining operations.

- Governance Workshops
- Cloud Architecture & Design
- Virtual CISO
- Cybersecurity Technical Assessment

#### Policy Bundle

Ensure IT programs, systems, and environments uphold policies and protect critical data.

- Policies
- Critical
- Acknowledgments

#### Colocation

Leverage a strong network of purpose-built, enterprise-class, Tier III data centers across six edge markets.

- Physical Controls
- Environmental Controls
- Availability
- Internet

#### Managed Services

Focus on innovation and client services while Involta manages essential services that connect systems, programs, and applications.

- Managed Firewall
- Managed Server
- Cloud Management
- Managed XDR
- Configuration Management
- Vulnerability Management
- Disaster Recovery

#### Managed Detection & Response

Protect IT infrastructure, systems, and data with a strong defensive strategy.

- 24/7 SOC Monitoring
- MDR Concierge
- Real-Time Reporting & Triage
- Advanced Threat & Intrusion Detection
- User Behavior Anomaly Detection
- Remediation Assistance

**FORTRA**

## Involta SecureFinance<sup>SM</sup>: Strength and Security

Involta Secure<sup>SM</sup> was designed to protect IT environments. Involta SecureFinance<sup>SM</sup> adds Fortra's Alert Logic's expert managed detection and response services to give companies in the Financial Services industry an unmatched advantage in IT security.

# FORTRA

Involta Secure<sup>SM</sup> is the first line of defense against IT security breaches and attacks – it's the core of our Security Operations Center (SOC). As a dedicated security team, our job is to monitor and analyze our clients' security posture 24/7 from our SOC. When we identify a potential threat or intrusion, we'll apply proactive defensive solutions.

Involta has strengthened our Involta Secure<sup>SM</sup> service line with Fortra's Alert Logic's innovative Software as a Service (SaaS) model to transform business IT environments. Fortra's Alert Logic's SaaS delivers unrivaled security value to identify and address breaches and gaps before they can cause real damage.

- 1. Protection & Governance** – We integrate security toolsets to detect and take action, and work with you to develop and enforce policy restrictions, configuration management, and standardization.
- 2. Risk Awareness** – We help customers understand their threat risk at any point in time and know whether it is increasing or decreasing, and how to prioritize efforts to reduce overall threat risk as quickly and cost effectively as possible.
- 3. Identification** – Our SOC team performs security checks and scanning to identify critical vulnerabilities unique to your business, then communicates problems and risks to the appropriate teams.
- 4. Maintenance** – You focus on business. Our team handles labor-intensive critical tasks: applying patches, managing firmware updates and fixes, backups, and documentation.
- 5. Asset Visibility** – We give customers visibility across all environments, workloads, and devices with one solution.
- 6. Threat & Response Expertise** – We identify and resolve potential threats quickly by using advanced machine learning and user behavior analytics to analyze activity across thousands of customers.
- 7. 24/7 Expert Monitoring** – Our expert security analysts respond to any critical incidents within 15 minutes, and we automatically respond to anomalous traffic, send alerts, and log notifications that are relevant in the context of your business.
- 8. Future Proofing** – We provide broad attack surface coverage from endpoints to server to cloud-based workloads with a flexible, risk-based approach.
- 9. Cloud and Hybrid Security** – We provide the ability to secure workloads and resources in cloud, on-premises, and hybrid environments leveraging a common security model.
- 10. Triage & Response** – Our team triages threats within 15 minutes to determine whether the threat requires escalation. We also provide guidance for quick remediation of any issues.
- 11. Validation & Compliance Readiness** – We make sure you're ready for anything with recurring health checks, assessments, and expert guidance to help streamline compliance efforts and simplify audit preparation, while providing advisory notices based on gaps and risks.

## Factor Us In

Secure IT systems are essential to business success. Industry-leading companies require purpose-built data centers, network, private and public cloud, enhanced security, strategy, and consulting. Involta and Fortra's Alert Logic offer all this plus industry advisory opportunities to ensure you have all the components for success. Contact us today to learn more about how we can help
