

# Involta Security Operations Center (SOC) Overview

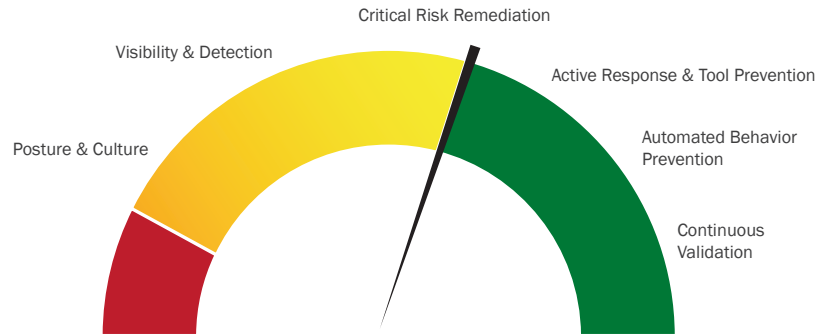

*Solutions for clients who need innovative, advanced security measures.*

Doesn't it feel great to know that someone's got your back? That is the primary purpose of Involta Secure and our Security Operations Center (SOC). The SOC is always hard at work monitoring and analyzing your security posture so that you can be hard at work managing your business. Do you know where your business falls on the cybersecurity preparedness scale?

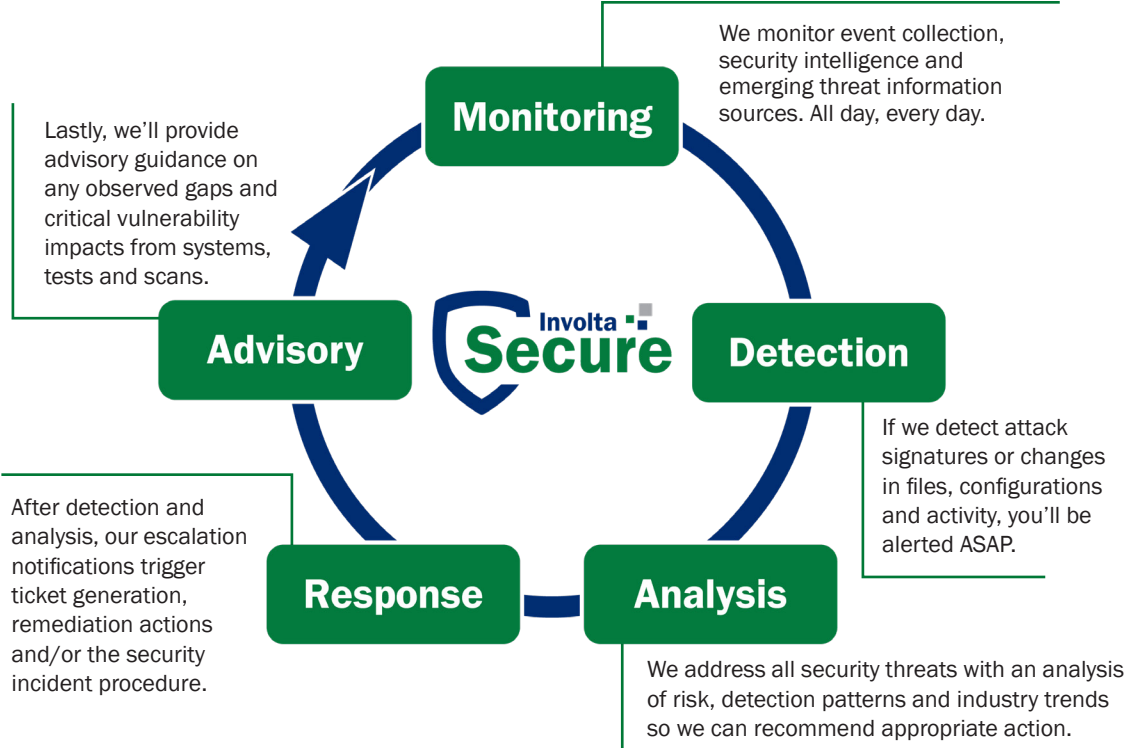

When our predictive toolsets detect threats or intrusions, we will apply proactive solutions to defend your business. Think of the SOC as your personal security detail protecting what matters the most.

## Cybersecurity Preparedness Score

### The SOC Monitoring Process

The Involta SOC provides clients with a dedicated security team that monitors and analyzes their security posture constantly, ensuring a proactive approach to security threats and intrusions. This is the ideal solution for clients who need innovative, advanced security measures.

Protect your business with best-in-class security solutions from the Involta Security Operations Center (SOC).
