

# Security Operations Center Services Overview

## Monitor. Detect. Respond.

IT security is an around-the-clock, 24/7/365 job. Not many have the time and experience to dedicate to security monitoring. Don't panic. Involta's Security Operations Center (SOC) has you covered.

The Involta SOC provides a dedicated security team to monitor and analyze our clients' security posture, allowing us to detect and remediate threats and intrusions efficiently. If you need advanced security measures, trust Involta to help you Get There.

## Let Involta Protect Your Business

Our SOC Services team stretches beyond Involta to include the strategic partnerships we've cultivated over the past several years. In 2020, we partnered with Alert Logic, the industry's first managed detection and response provider. Our MDR services combine our team of technical experts with the award-winning managed detection and response solution from Fortra's Alert Logic to provide global 24/7/365 protection across an organization's private and public IT infrastructure.
