

Involta Hybrid Cloud

Automate your cloud infrastructure in a single pane of glass

Involta Hybrid Cloud Simplifies Your Infrastructure Management

Business lives in the cloud. Actually, today's business lives in multi-cloud environments that combine solutions across the public cloud, the private cloud and the hybrid cloud. But what belongs where? And what if you want to move your applications, servers, storage or networking firewalls to a different cloud environment? Involta Hybrid Cloud can organize your infrastructure across the multi-cloud. It's as easy as answering a few simple questions with a quick result.

- ✓ No more calling your IT services provider to put in a ticket and request additional resources
- ✓ No more waiting on anyone else's schedule but your own
- ✓ No more creating lists in your head of the opportunities lost while anticipating an answer

A Custom Portal for Your Business Needs

Involta Hybrid Cloud is available in two levels, to support businesses of all sizes and needs. The portals are designed to scale with your business, so you can add features as you grow.

Involta Hybrid Cloud STANDARD

A provisioning portal that gives you full control of server instances across all your cloud environments. Manage backup, monitoring, patching, antivirus and more, all from a single, easy-to-use portal.

- Same-day onboarding
- Straightforward user interface
- Easy-to-manage user access
- Hybrid cloud provisioning capabilities
 - Involta CompliantCloudSM or dedicated IaaS
 - AWS
 - Azure
- Consolidated financial governance and billing
- Integration with your VMware vCenter investment

Involta Hybrid Cloud ENTERPRISE

A more deeply-customized portal created with your business in mind. Access all the STANDARD portal features with increased flexibility plus the ability to create templates, manage your OS, and more.

Involta Hybrid Cloud Enterprise includes an Involta Hybrid Cloud Consulting Package and the opportunity to custom-create the portal to suit your company's unique needs.

- Advanced user group access
- Streamlined hybrid cloud governance
- Custom application blueprints
- Dedicated VMware environments
- Dev-Ops ready framework

Taking control of your cloud infrastructure just got easier with Involta Hybrid Cloud. Explore the possibilities and help your team optimize performance at the pace you want to move. Contact the Involta team today.
