

HallReadySM

Enterprise Colocation

Every institution is unique. Some might need a rack or two. Others require an entire data hall. Involta proudly offers a range of colocation options within our fully compliant, premium wholesale data center environments. Our powered shell space can be built out and deployed within 16-18 months.

- Powered shell space can be built to your specifications or Involta's standards
- 1-2 MW data halls, can be delivered in 100 kW increments of dedicated power
- Highly available power delivery in a 2N configuration, or customized to meet your needs
- Innovative liquid cooling available for HPC clusters
- Highly connected fiber ecosystem (12,000 fiber miles)
- High-speed public cloud on ramps
- Blended internet connection available (network design, BGP expertise, connectivity availability)
